**Notes**

1. Target: To be among top 10 providers in UK. In order to reach 10th place a minimum score of 18.67 is currently required.
2. Oxford Score: UK validated questionnaire, 12 questions, minimum score is 0, maximum score is 48.
3. Average health gain: post op score minus pre op score.
4. Comparisons based on HSCIC Unadjusted Scores for a minimum amount of 30 patients.
5. Gaps (where no patients were surveyed) in charts are represented in grey
6. Current ranking: based on our current score and compared with Unadjusted scores for 246 hospitals in UK.
7. Data for comparison sourced from Health and Social Care Information Centre website <http://www.hscic.gov.uk/PROMs>
8. Reporting period: rolling data starting from October 2011. Each quarter more patients' scores will be available and as a result the average health gain will change.
